Special offer: 'A Master's Approach' & 'Be Inspired' in one book for € 39,00 of US\$ 39,00

Be Inspired

In this E-book, Frank shows all the ins and outs for over 15 kiln-forming projects. One hundred fifty pages filled with hundreds of pictures, drawings, schedules and information on the technique of shaping glass in your kiln. An inspiring range of, often unusual forms, each project with a clear

explanation of the theory and firing cycles.

Firing cycles given in F per hour, C per hour and time. Frank exhibits all over the world; over 30 museums have his work in their collection.

Frank is also known for conducting workshops in over 30 countries. He generously shares all the knowledge that made him the well-known artist he is. E-book in PDF, price €23,50.

Just Float

This book explains the theory of kiln-forming float glass in more than 14 kiln projects using float glass. One hundred thirty pages with hundreds of pictures, drawings, schedules and information. A range of, often unusual forms, each project with a clear explanation of the theory and firing cycles. This book is written for those that use or want to use float glass. If you already have one of the the earlier books: quite some theory and projects are the 'translation' in 'float language', and this book may not be for you. If you (want to) work with float glass, this E-book is essential. Firing cycles are given in F per hour, C per hour and time. Frank exhibits all over the world; over 30 museums have his work in their collection. Frank is also known for conducting workshops in over 30 countries. He generously shares all the knowledge that made him the well-known artist he is.

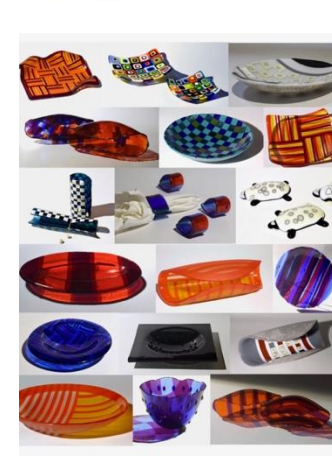

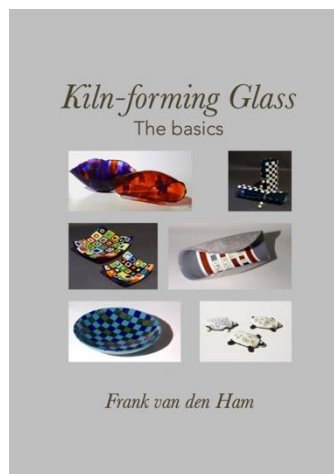

E-Book in PDF price €23,50

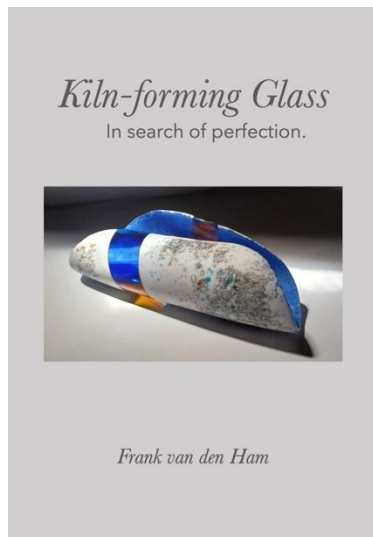

The Basics

A book written with a kiln worker in mind with a (relatively) small kiln and no machinery. In 18 projects, 112 pages, the book describes and explains all the possibilities in kiln-forming with no use of commercial moulds. All the basics of kiln-forming, easy to apply in your own studio. This book will enhance your skills and broaden your horizon, it will bring your skills to the next level.

Those that already purchased 'A Master's Approach' or 'Be Inspired' don't need this book. Firing cycles given in F per hour, C per hour and time. Frank exhibits all over the world; over 30 museums have his work in their collection. Frank is also known for conducting workshops in over 30 countries. He generously shares all the knowledge that made him the well-known artist he is. E-book in PDF, price €23,50

In this latest book, Frank van den Ham guides you through the creation of 12 unique and exciting projects. With an eye for every "small detail" and any obstacles along the way, he explains how to achieve perfection in an object. The clear text and numerous photos and diagrams make this book a valuable resource for any kiln worker "in search of perfection." All firing cycles are indicated in Celcius, Fahrenheit, and time.

More than 120 pages packed with tips and knowledge based on his 45 years of experience as a leading glass fusing artist. E-book as PDF. € 25,--
